Office Action Summary

Application No.

10/696,088

Applicant(s)

MA ET AL.

Examiner

Satya B. Sastri

Art Unit

1713

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 April 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-23 and 25-27 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-23, 25-27 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This amendment is in response to amendment filed on April 7, 2006. With the addition of new *claims 1-23, 15-27* are now pending in the application.

2. Applicant's amendment and arguments have been fully considered but not found persuasive and thus, all rejections presented in the earlier office action are sustained.

Response to Arguments

3. With regard to prior art to Barsotti et al., applicant's argue that the prior art includes three essential components while the corresponding component of the instant invention includes only a copolymer and silica and does not require a polyethylene glycol component. Applicant's attention is drawn to Table 7, examples 1-3 of the instant disclosure which clearly includes a low molecular weight polyol. Since the prior art polyol has a wt. average mol. wt. of 800-400,000, it is the examiner's position that the low end of the molecular weight satisfies this requirement. The arguments centering around the number of the components in the coating composition is vague and applicant's attention is drawn to the number of components in table 7 of the instant disclosure.

Additionally, while it is recognized that the phrase "consisting essentially of" narrows the scope of the claims to the specified materials and those which do not materially affect the basic and novel characteristics of the claimed invention, absent a clear indication of what the basic and

Art Unit: 1713

novel characteristics are, “consisting essentially of” is construed as equivalent to “comprising”. Further, the burden is on the applicant to show that the additional ingredients in the prior art, i.e. polyethylene glycol having a wt. average mol. wt. of 800-400,000, would in fact be excluded from the claims and that such ingredients would materially change the characteristics of the applicant’s invention, See MPEP 2111.03. Moreover, the statement that claims under review do not require polyethylene glycol is a conclusory statement with no evidentiary weight, i.e., attorney’s statements are not a substitute for factual evidence. Case law holds that “[i]f an applicant contends that additional steps or material in the prior art are excluded by the recitation of ‘consisting essentially of,’ applicant has the burden of showing that the introduction of additional steps or components would materially change the characteristics of applicant’s invention.” *In re De Lajarte*, 337 F.2d 870, 143 USPQ 256 (CCPA 1964). Applicant is advised to submit clear and convincing evidence in the form of a declaration that polyethylene glycol would materially affect the basic and novel characteristics of applicant’s invention.

Rejection of claims over Briggs et al. is also sustained. Firstly, the composition as recited in instant claim 1 reads on the basecoat composition disclosed in column 8, lines 10-30, which clearly includes all the components. Thus, inventive compositions 1-4 in table 1 of the prior art consist of a crosslinkable acrylic copolymer, fumed silica and crosslinking agent. With regard to the rejection of claim 25, the prior art discloses a process of producing the coating by including an epoxy functional acrylic polymer in addition to an acid containing acrylic copolymer as crosslinkable component. However, absent a clear indication of what the basic and novel characteristics are, “consisting essentially of” is construed as equivalent to “comprising”. Further, the burden is on the applicant to show that the additional ingredients in the prior art, i.e.

Art Unit: 1713

epoxy functional acrylic polymer, would in fact be excluded from the claims and that such ingredients would materially change the characteristics of the applicant's invention, See MPEP 2111.03. Case law holds that "[i]f an applicant contends that additional steps or material in the prior art are excluded by the recitation of 'consisting essentially of,' applicant has the burden of showing that the introduction of additional steps or components would materially change the characteristics of applicant's invention." *In re De Lajarte*, 337 F.2d 870, 143 USPQ 256 (CCPA 1964). Applicant is advised to submit clear and convincing evidence in the form of a declaration that epoxy functional acrylic polymer would materially affect the basic and novel characteristics of applicant's invention.

With regard to Bederke et al., the prior art discloses coating composition comprising copolymers comprising 0.6-7.50% acid monomer (abstract). Working example 3 disclosed in the office action includes a crosslinkable component consisting essentially of an acrylic polymer as a crosslinkable component. Applicant's arguments that Bederke et al. require amides of (meth)acrylic acid and phenyl alkyl esters of (meth)acrylic acid are not found persuasive because such limitations are not disclosed in the instant invention. The composition of the acrylic copolymer as recited in instant claims is open ended with respect to the various comonomers.

Action Is Final

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1713

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Future Correspondence

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Satya Sastri whose telephone number is 571-272-1112.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on 571-272-1114. The fax phone numbers for the organization where this application or proceeding is assigned is (571) 273-8300 for regular communications. The unofficial direct fax phone number to the Examiner's desk is 571-273-1112.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR
